LOOK AND FEEL AMAZING

Every woman wants to wake up feeling like her best self, both emotionally and physically. And your confidence should carry you through your entire day, whether you're showing off your swimsuit, hitting the gym or just enjoying a quiet evening at home.

SKIN NEEDLING

Skin Needling with Dermapen 4 is a safe and highly effective treatment for a number of conditions. Skin Needling involves the use of a device, with multiple fine needles that create minute punctures of the skin, prompting the generation of Collagen and skin renewal

WHAT DOES IT TREAT

Skin Needling is great for treating the following skin concerns:

- Rosacea
- Pigmentation
- Acne Scarring
- Trauma Scarring
- Stretch Marks
- Enlarged Pores

COMBINATION TREATMENT

Skin Needling is even more effective when used in combination with other treatments such as Laser Genesis and Omnilux LED Light Therapy. This may depend upon your skin concern and treatment protocol required.

RED LED AND ACTIVE INGREDIENTS

Red LED is a real unsung hero. We know, we use this for other facial skin treatments and our clients love it's almost hypnotic effects. The red LED allows the active skin care ingredients to penetrate deep into your skin tissues, and the LED then helps rejuvenate and repair your skin.

COST EFFECTIVE

Skin Needling with Dermapen 4 can be undertaken as a single treatment, or can be bought as a pack of 3 or 6 treatments. We recommend at least a course of 4 treatments to get the results that you are looking for. This will of course depend upon your own personal circumstances and skin concerns

DOWNTIME

you may experience some redness with this treatment, but this will quickly reduce within hours

OUR TEAM

Our team is waiting to show you how Skin Needling with Dermapen 4 will provide great results for you. Call them on 02 9567 0399 for more information
